

Notice of Full Road Closure

Location: Wellington Main Street between Cleminson Street and the entrance to the Wellington water and wastewater treatment plant

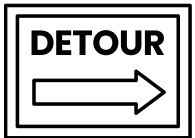

When: Starting Monday, January 13, 2025

The closure will continue for several months depending on the progress of work.

Through traffic will not be permitted during the full road closure. Local traffic access will be maintained for residents living within the closure limits.

Pedestrian access through the road closure area will be maintained. Segments of the sidewalk may be closed, during which time temporary pedestrian by-pass will be provided.

The **main detour route** is Loyalist Parkway, Greer Road, Danforth Road, and Consecon Street.

An alternate detour route will be in place to assist with traffic delays on Wellington Main Street. Eastbound traffic can detour around the Village of Wellington by following Danforth Road and Swamp College Road.

Project Background Summary

- A new trunk watermain is required to meet the water distribution and storage needs of the existing residents and future development within the Wellington urban serviced area.
- The new sewer trunks will accommodate the anticipated increase in wastewater flows from new developments.
- The project includes a new sanitary pumping station located on the Millennium Trail near the intersection with West Street. This pumping station is a component of the new trunk sanitary sewer.
- The municipality expects to complete the project by the end of 2025.

Frequently Asked Questions

Why is a full closure necessary? Why couldn't you leave one lane open like other road construction projects?

The new water and sanitary trunk mains are located under the existing road surface. The design team looked at all options to keep one lane of Wellington Main Street open during construction. A full road closure is necessary due to the required depth needed to install the new gravity sanitary trunk main. A bypass lane was not possible because of the location of existing surface and underground infrastructure including hydro and gas lines.

I live within the road closure area (Wellington Main Street between the water plant and Cleminson Street). How will I access my home?

Access to your home and driveway will be maintained for the majority of time that the full road closure is in place. When construction is right in front of your driveway, you will not be able to use your driveway for a short time. Notice of this restriction with details about how long your driveway will be impacted will be hand delivered by the project team and alternative arrangements will be made for your vehicle and access to your home.

Will emergency services (fire, paramedics, police) still be able to access my home?

Yes. The project team is in constant communication with emergency services to ensure they are aware of the construction location. Emergency services will make arrangements to respond in the most effective way possible.

Will I still receive garbage and recycling pick up during the road closure?

Yes, garbage and recycling pick up will be available within the full road closure. When construction is right in front of your driveway, you can still put out your garbage and recycling as usual and the project team will make arrangements for it to be picked up.

I require specialized transit service. Will County Transit still be able to pick me up at my door?

Access to your home and driveway will be maintained for the majority of time that the full road closure is in place. When construction is right in front of your driveway, you will not be able to use your driveway for a short time. You will receive a written notice in advance of your driveway being impacted. The project team will also alert County Transit so that it can make alternative arrangements for picking you up and dropping you off.

Will delivery trucks have access to my home during the closure?

Local deliveries will continue throughout the full road closure. If you are expecting a delivery when construction is right in front of your driveway, you are encouraged to contact the company or service provider and make alternative arrangements for your delivery.

How will the closure impact school bus pick up and drop off?

School bus companies are aware of the road closure and will make the necessary arrangements for pick up/drop off.

Will both sidewalks be blocked during the closure?

Pedestrian access through the road closure area will be maintained. During the construction, segments of the sidewalk may be closed. A temporary pedestrian by-pass will be provided during those times.

I am concerned about the detour route. Will it be able to handle the additional traffic?

The roads designated for the detour route currently meet minimum maintenance standards for municipal highways. Patrols will occur on these roads according to the provincial regulations throughout the detour. Should the road condition not meet the standard, staff will take corrective action. In anticipation of increased traffic volume on these roads, staff will increase inspection and maintenance along the detour route.

Who can I contact if I have issues or concerns with this project?

Christopher Timpson, P.Eng. – Project Manager, County of Prince Edward
